Business analytics (BA) is a set of disciplines and technologies for solving business problems using data analysis, statistical models and other quantitative methods. It involves an iterative, methodical exploration of an organization's data, with an emphasis on statistical analysis, to drive decision-making. Data-driven companies treat their data as a business asset and actively look for ways to turn it into a competitive advantage. Success with business analytics depends on data quality, skilled analysts who understand the technologies and the business, and a commitment to using data to gain insights that inform business decisions.

To understand in depth this training enabled the students in getting a better usage of the tools in Business Analytics.

### Report on the Session for Specialization Specific Skills

Neville Wadia Institute of Management Studies and Research organized training on how to enhance our skills based on our specialization and improve it on 6th January 2023. The session was conducted by Prof. Vincent Kedari, Head – Corporate Relations & Placement, NWIMSR.

The session was incredibly informative and provided us with valuable insights on how to take our abilities to the next level. Highlighting the importance of understanding our strengths and weaknesses, and how to leverage them to our advantage was one of our key learning. He also emphasized the need for continuous learning and development, and provided us with practical tips.

Another important aspect of the training session was the focus on goal setting and planning. He stressed the importance of setting clear and realistic goals for ourselves, and provided us with a framework for creating actionable plans to achieve them. He also discussed the importance of being flexible and adapting our plans as needed, in order to achieve success.

### Report on the Interview Preparation Session on Finance Operations

A session on the topic "Finance Operations" was conducted for the Citi Bank shortlisted MBA students (Batch 2021 – 2023) on 21<sup>st</sup> January 2023. Dr. Abhay Kinikar, Associate Professor, NWIMSR conducted the session for the students with reference to the preparation of the students for the interview. The session was organized by Asst. Prof. Vincent Kedari, Training & Placement Officer in coordination with student coordinators Mr. Sameer Patole & and Mr. Ganesh Zope.

The objective of conducting this session was to –

- Get students interview ready
- Prepare students with reference to the JD provided by Citi Bank
- Assess students on their knowledge with reference to the JD
- Solve students queries in terms of Technical round questions

Dr. Kinikar spoke about Finance Operations and mentioned that when it comes to numbers, there is always more than what meets the eye. In operational finance, you will learn how to read the "story" that the balance sheet and income statement tells about the company's operations. The insights you gain from this "financial story" will then become a tool for short-term decision-making at the top management level relating to current assets, current liabilities and the management of working capital.

Finally, he ended the session by making the students understand the financial consequences of managerial decisions on operations, marketing, etc.
